#1

How do I publish?

WHAT'S HAPPENING?

Right now only you can see your project. Publishing gives it a link anyone can open. Unfinished is fine. Publish early, publish often.

TRY THIS

1. **Ask ChatGPT (or Codex):** "Make our project a website." Say "website" or type @Sites.
2. **Test the preview.** Ask it to fix anything that's off.
3. **Ask:** "Deploy this site and give me the URL."
4. Open **Share** → **Who has access** → pick the widest option you're allowed (**Anyone on the internet**, if you see it).
5. **Open the link on a phone.** It opens there? You're live.

STILL STUCK?

No "Anyone on the internet" option, or the link won't open on a phone? Flag a facilitator. Changed something? Ask it to deploy again, then check the link.

NEXT STEP

Publish in your first 30 minutes of building, then every 30 minutes: 9:15, 9:45, 10:15, 10:45, 11:20 (afternoon: 2:15, 2:45, 3:15, 3:45, 4:20). Show a facilitator your live link.
