#3

AI doesn’t understand what I’m asking.

WHAT’S HAPPENING?

AI can’t see your screen or read your mind. It only knows what you type (or paste, or show it).

TRY THIS

Give it 4 things:

1. **Who** it’s for
2. **What** you want
3. **What you have** (paste the code or a screenshot)
4. **What “done” looks like**

⊗ “make a quiz”

✓ “Make a 5-question quiz web page for 7th graders about recycling. Show one question at a time. At the end, show their score and a ‘try again’ button.”

Or add: “Before you start, ask me 3 questions.”

STILL STUCK?

Start a fresh chat. Paste only what matters. Long, messy chats confuse AI.

NEXT STEP

Read your prompt out loud to a teammate. If they don’t get it, the AI won’t either. Then flag a facilitator.
