#4

AI gave me something wrong or weird.

WHAT'S HAPPENING?

AI guesses what sounds right. Sometimes it sounds right and is totally wrong. It can make up facts, links, and code.

TRY THIS

1. **Tell it exactly what's wrong:** "You said ___. That's wrong because ___. Try again."
2. **Make it check itself:** "How sure are you? What could be wrong with this?"
3. **Check facts somewhere else** before you put them in your project.

STILL STUCK?

Ask a smaller question. Break the big request into steps. Or try a different AI tool and compare.

NEXT STEP

If it's creepy, mean, or unsafe — stop and tell a facilitator right away. You won't get in trouble. Otherwise, flag a facilitator.
