#7

How do I share something with my team? (LocalSend)

WHAT'S HAPPENING?

You need to get a file from one device to another. No email, no USB, no cloud.

TRY THIS

1. **Get it:** go to localsend.org → download it for your device → install → open.
2. **Both open LocalSend.** Both on the event Wi-Fi.
3. Click **Send** → pick the file or folder.
4. Tap your teammate's device name.
5. They click **Accept**. Done.

STILL STUCK?

Can't see each other? Check you're on the same Wi-Fi. Close and reopen LocalSend. If your computer asks to allow LocalSend through the firewall, click Allow. Rename your device to your first name (Settings) so you can find it.

NEXT STEP

Sharing your project? Send its live link instead (radiator #1). Still stuck? Flag a facilitator.
