#15

How do I capture screenshots or record the demo?

WHAT'S HAPPENING?

You need proof of what you built: pictures and a video of it working (or almost working).

TRY THIS

- **Mac:** Shift + Command + 5 → pick screenshot or record. Stop recording: click ■ in the top menu bar.
- **Windows:** Windows + Shift + S (screenshot). Windows + Shift + R (record with Snipping Tool).
- **Chromebook:** Ctrl + Shift + Show Windows (the ▭II key) → pick screenshot or record.
- **Phone:** last resort. Hold it sideways and steady.

STILL STUCK?

Can't find the file? Mac: Desktop. Windows: Pictures → Screenshots, or Videos → Screen Recordings. Chromebook: Files → Downloads. Want your voice in the recording? Turn on the microphone in the recording options.

NEXT STEP

Take screenshots as you go, even of broken versions. They tell your story. Need help? Flag a facilitator.
