#17

Keeping the AI churning.

WHAT'S HAPPENING?

Your AI is sitting idle while you figure things out. The best teams keep their AI busy the whole time.

TRY THIS

1. **Have the next prompt ready** before this one finishes.
2. **Give it bigger jobs:** "Build ___, then test it, then tell me what's still broken."
3. **Two laptops = two AIs** on two different parts.
4. **Ask it for the plan:** "What should we build next? Write the next 3 prompts for me."
5. **When it finishes:** check it, then send the next prompt in under a minute.

STILL STUCK?

Out of ideas? Ask it to improve something: "Make this easier for a 7th grader to use." or "Find 3 bugs in this and fix them."

NEXT STEP

Facilitators will walk by and ask, "Is your AI working right now?" Have a yes.
